

Numbers 1–10

Numbers are a fundamental part of daily communication. In Serbian, the numbers from 1 to 10 are: jedan, dva, tri, četiri, pet, šest, sedam, osam, devet, deset. Each number is tied to its own unique pronunciation and form, so repetition and listening are key to remembering them. These numbers are used in everything from telling time to counting money, so it's crucial to be comfortable with them early on. In this lesson, you'll go through each number individually, with audio, visuals, and usage examples in real-world scenarios. You'll practice asking and answering questions like "Koliko imaš godina?" (How old are you?) and "Koliko to košta?" (How much does that cost?). By the end, you'll not only be able to count but also apply numbers confidently in conversation.
